RS EDEN has a longstanding reputation of working successfully with people who have a substance use disorder, specializing in serving culturally diverse, poly-drug addicted adult males and females. Our treatment programs include individual and group counseling, relapse prevention, health care, independent living skills and socialization. Our staff uses best practices through cognitive behavioral approaches, motivational interviewing, and twelve-step facilitation. Our team has extensive experience working with the criminogenic population with notable success. RS EDEN uses the ASAM (American Society of Addiction Medicine) criteria for levels of service.

PROGRAMS

For the past 44 years, Eden House has been providing residential services to men and women with substance use disorders in Hennepin and surrounding counties. RS EDEN’s residential programs are modified therapeutic communities, which utilizes a cognitive behavioral approach. The individuals we serve often have histories of substance use disorders, may be homeless, have significant involvement with the criminal justice system, drug courts, child protection and have received treatment services throughout their lives. Participants involved in our programs often have minimal family, financial and social resources at their disposal.
Since 1971, RS EDEN has been a leader in delivering effective community human services in Minnesota. From early achievements in substance abuse treatment and correctional residential programs, RS EDEN has evolved into a multi-faceted agency whose mission is to provide a spectrum of care—recovery and support services—to best facilitate self-sufficiency for individuals, families, and communities. We believe that with structure, stability, and accountability, people can and do change. RS EDEN seeks to rebuild communities, one person at a time.

More information is available at www.rseden.org.

OUTPATIENT PROGRAM
RS EDEN outpatient programs vary in levels of service and time commitment. Participants may need as much as 30 hours of service per week or as little as an hour per month. The length of stay is based on the individual’s assessment, treatment planning and completion of goals and objectives while in the program.

GENDER SPECIFIC
Eden House provides gender specific programming for both men and women. Some of the specialty services offered include family and relationship counseling, parenting education, psychological services, nursing services, and assistance dealing with employment, housing, legal, and family reunification.
